Art Unit: 3683

DETAILED ACTION

1. The submitted prior art filed March 10, 2003 will be considered.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a method for manufacturing a leaf spring or system for manufacturing a leaf spring, classified in class 264.
 - II. Claim 15, drawn to a leaf spring, classified in class 267.

Inventions I and II are related as method or system of making(system) and product made. The inventions are distinct if either or both of the following can be shown: (1) that the method as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different method (MPEP § 806.05(f)). In the instant case, the method can be used to make non-leaf spring devices and the leaf spring can be made by different steps.

Because these inventions are distinct for the reasons given above and the searches required for Groups I and II are different, restriction for examination purposes as indicated is proper.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Exmr. Butler whose telephone number is (703) 308-2575. The examiner is normally in the USPTO Monday-Friday from 5:30 a.m. to 2:00p.m. Although the examiner may not always be present in his office to immediately answer the phone when called, the examiner will make every effort to return the call as soon as possible. If the examiner does not answer his
